Subject: Likely Yakama "Asks" in upcoming G2G meeting

---

Hello, Chris.

We heard some more specific issues from the Yakama Nation this week. I think both our agencies should be prepared to speak them at the G2G in April. Wanted to share these with you so you can prepare your managers. I am not exactly sure what our responses will be. I quickly drafted something today, but fully expect changes. We should touch base on these during our prep session on Tuesday. Here are the potential "asks":

#### FFA Schedule and Yakama Involvement

Complete the Federal Facility Agreement (FFA) within 1 year to minimize delays, and allow for Yakama input during the negotiation.

#### Interim Actions

Move forward now with substantive cleanup actions where agreement already exists between parties (e.g. complete removal of the landfill and shallow excavation and capping at the pistol range).

#### Regular Technical Meetings

Schedule regular technical engagement meetings that include all governments that are involved in Bradford Island.

Not the best timing, but I will be out of the office all next week on the east coast. I will be attending some meetings and (b)(6). I do plan to call in by phone for the G2G prep meeting on Tuesday. If anything comes up that can't wait, contact Rich and/or feel free to contact me – text or call my cell.

Regards,

Helen Bottcher (she/her) | U.S. Environmental Protection Agency, Region 10
